Notice: While every effort has been made to reproduce these drugs in an accurate manner, variations in colour may exist because of the photographic reproduction and printing processes. In addition, manufacturers may from time to time change the appearance of their products, subject to Canadian regulatory requirements. Pamphlet attempts to summarize the marketed tablet/capsule/patch opioid/stimulant products, but may not be all inclusive. It is noted that there may be other opioid/stimulant brands marketed from time to time that are not shown in this pamphlet. Positive identification of any drug requires analysis by an authorized laboratory. All trademarks mentioned in this pamphlet are the property of their respective owners.
* Combination Preparation — contains opioid and non-opioid drug substance(s).
** Opioid refers broadly to all compounds related to opium.
